

PET MATCH

Get matched with the right cat

PROBLEMS

- **Failed adoptions**
 - Pets are adopted and **returned**, because **the pet was not what the adopter expected**.
 - This is a **problem for independent shelters** that have to allocate resources for that returning pet.
- **Adopting a pet in Germany is hard**
 - Websites are **difficult to navigate**.
 - **Independent shelters often don't have a website**, and rely on social media.
 - People tend to **give up on adopting** and decide to buy a pet instead

SOLUTION

A user friendly platform that finds the best **cat match** for people that want to adopt a cat in Germany through a lifestyle and personality quiz.

NEXT STEPS

Reach out to
shelters for
proper user
research

Develop
shelter area for
shelters to
input their cats

Include like/heart
feature and use this
feature to train our
matching algorithm

Train and improve
recommendation
model with data
from real shelters
in Germany

Improve user
area to feature
all cats/pets
they liked

FUTURE VISION

- Proper UX research that includes the possible adopters and the shelters
- Extend it further to dogs as well
- Develop a user area, featuring all cats/pets they are interested in
- Implement more lifestyle questions to the adopter (how much time they spend at home, etc)
- Work on responsiveness
- The possibility for the users to apply for adoption directly through the platform
- Integrate map to show shelter location
- German version
- App for iOS and Android
- Video of the pets
- Proper User Authentication
- Better logo

CHALLENGES

- ! No support and reply from UX
- ! Understanding what the other tracks do
- ! Finding the right data set
- ! Defining the MVP
- ! Managing tasks and time

SUCCESS STORY

- ♥ Successful collaboration between all remaining tracks
- ♥ We learned so much and discovered other strengths
- ♥ Great support from other UX techies after midterms (thanks Siracha, Leticia and also Alba, from TechLabs <3)
- ♥ A lot of help from the community
- ♥ Tangible MVP

SPECIAL THANKS
